Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to the Amendment filed on February 06, 2008. Claims 1-20 are pending and have been considered below.

Response to Arguments

2. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection because of the amendment.
3. The newly added limitation in the independent claim(s) "...the number or zero-valued samples calculated from a difference between the number of a plurality of Fourier transform bins and the number of the preamble symbols" is not supported by the Applicant's original disclosure. Therefore, the newly added limitation as above, raised an issue of new subject matter as this is not supported by the original disclosure.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

6. The new limitation added by the amendment in the independent claim(s) "...the number or zero-valued samples calculated from a difference between the number of a plurality of Fourier transform bins and the number of the preamble symbols" is not supported by the Applicant's original disclosure. In the disclosure Page 8, lines 1-15, refers to the differences between reference and transmitter frequency. On page 10 first few lines talks about phase difference, and on page 11, lines 10-22, it refers to the size of the preamble. Throughout the disclosure, it is never suggested or specified, calculating difference between the number of a plurality of Fourier transform bins and the number of the preamble symbols. Figures 1 and 2 of the original disclosure fail to support the claimed limitation of calculating the difference between the number of a plurality of Fourier transform bins and the number of the preamble symbols. Therefore, the newly amended limitation in the independent claims 1, 10, 19 and 20 raised an issue of new subject matter as this is not supported by the original disclosure.
